

Linnaeus Lap Top Desk -free for homebuild

Internationally renowned Swedish botanist Carl Linnaeus (1707-1778) had his own LapTop Desk made in Uppsala. Inspiration for the lecture chair probably came from foreign monasteries and university libraries. This reading chair was unique for the times and Linnaeus incorporated exceptional personality and comfort in its design.

He used it as both a study chair and a pulpit for lessons and lectures. Its uses, then as now, are many. Linnaeus LapTop Desk is comfortable for using your Lap Top Computer.

Technology and the media have developed dramatically since Linnaeus' time, but our needs for a good and comfortable reading chair remain unchanged, then as now.

In 2019 Sweden will celebrate the 16th World Heritage (Systematic Biology) with Carl von Linné in focus.

We offer You - today - one page instruction from www.laptopdesk.se.

This is an entirely new concept for the modern and flexible IT workplace. You build it yourself for private use or let a local carpenter do that for You. Updated, tested and adapted to today's demands for ergonomic computer furniture in a modern IT environment.

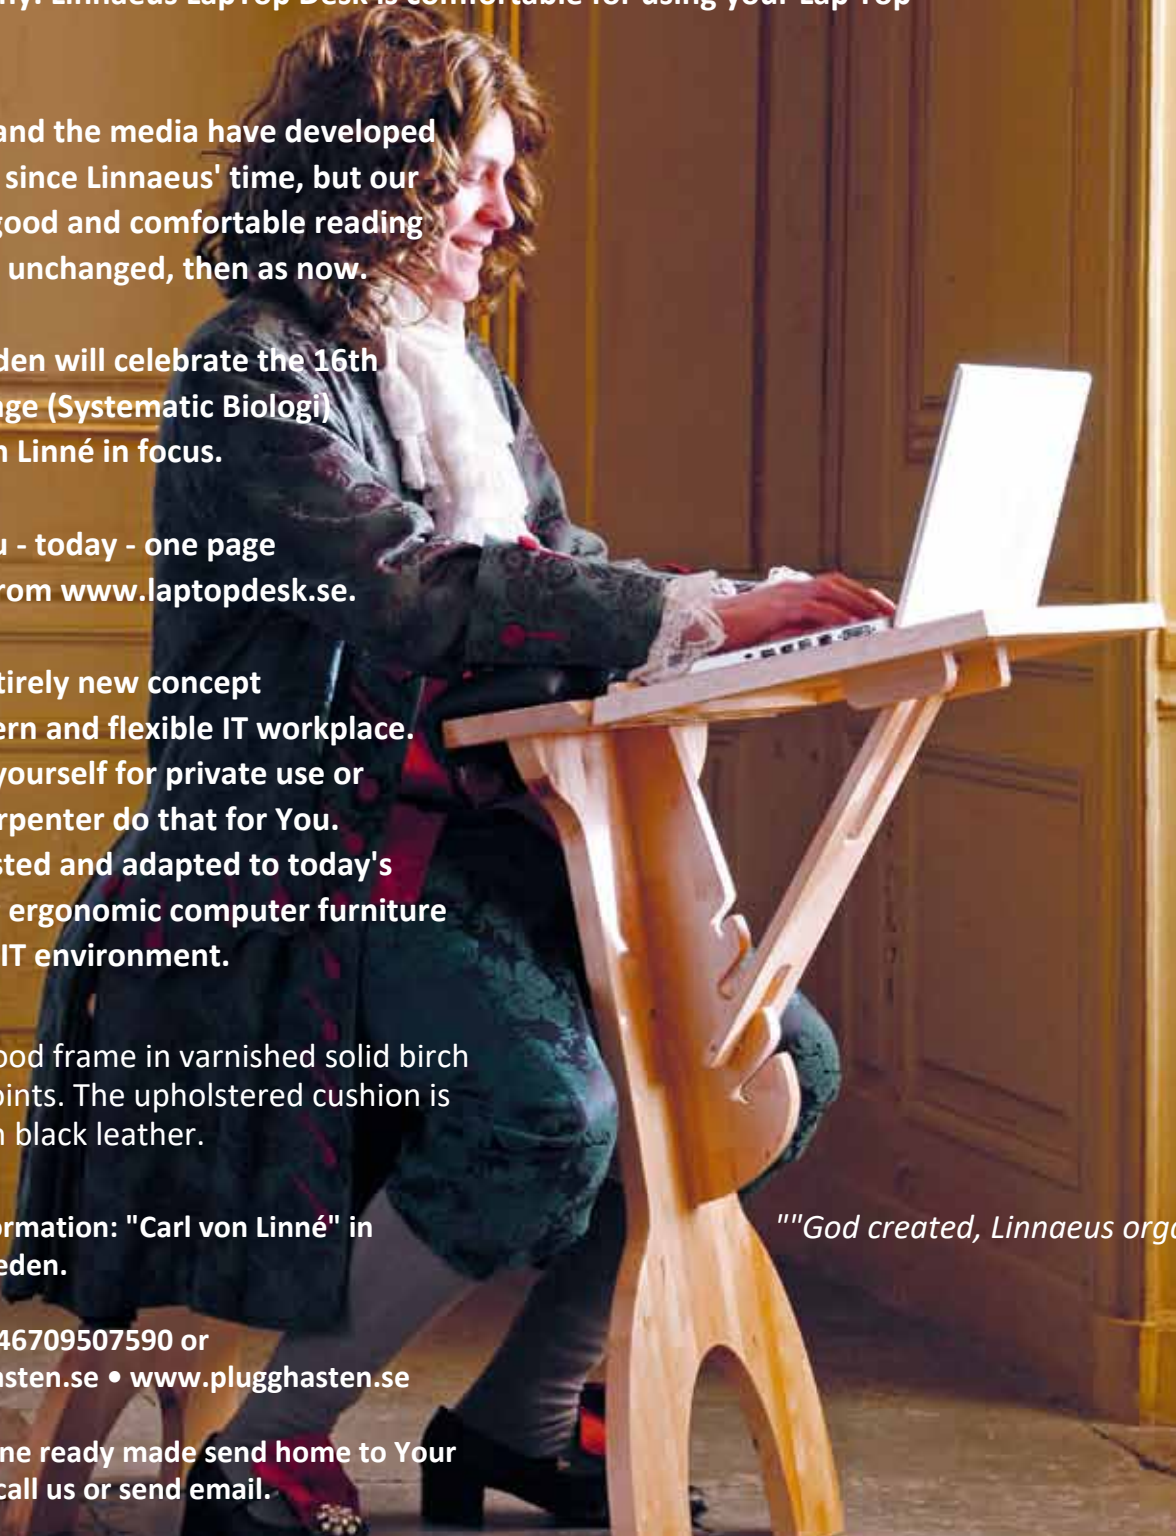

Material: Wood frame in varnished solid birch with glued joints. The upholstered cushion is covered with black leather.

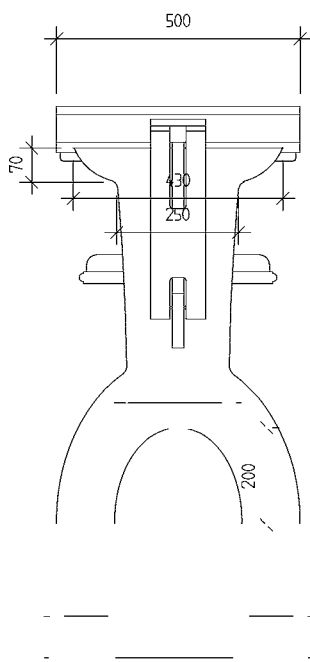

For more information: "Carl von Linné" in Uppsala - Sweden.
